SUMMARY

I finished the Front-end Developer course at Algebra University in Zagreb and I am seeking an opportunity to apply knowledge and gain practical experience as a Front-end Developer, Passionate about learning new technologies and delivering high quality websites and applications. Strong problem solving and team collaboration skills.

EXPERIENCE

Student Front End Developer

Algebra University  02/2023 - 10/2023  Zagreb

Developed web applications using technologies such as **HTML**, **CSS** and **Javascript**. Collaborated with peers and mentors to ensure high quality deliverables and positive user experience.

- Built responsive and accessible websites using **Bootstrap** and **CSS**, resulting in improved user engagement and experience.
- Built **React.js** chat application using the **Scaledrone** (a real-time messaging API) and modern React web app best practices, including using **Next.js**, **functional components** and **React Hooks**.
- Developed web applications using Version control tools such as Git, resulting in easy collaboration among team members

STRENGTHS

Analytical Thinker

Utilized critical thinking skills to identify and troubleshoot technical issues, resulting in efficient solutions and improved software performance.

Fast Learner

Quickly acquired new skills and knowledge, resulting in successful completion of projects and positive feedback from team members.

Team Player

Collaborated effectively with cross-functional teams, resulting in successful project delivery and positive user experience.
